ARTHUR L. MALLORY
Commissioner of Education

LINDA L. WARD
Executive Secretary

Members of the General Assembly
State of Missouri

Ladies and Gentlemen:

The State Board of Education herewith submits its One Hundred Thirty-Fourth Report of the Public Schools of the State of Missouri. This report, prepared in compliance with Section 161.092, Missouri Revised Statutes, covers the school year ending June 30, 1983.

We hope the information contained in this report will be of interest and assistance to you as you consider the needs and major problems of the public schools of the State of Missouri.

Respectfully,

Delmar A. Cobble
President, State Board
1982-83

Commissioner of Educaton

Linda L. Ward
Secretary, State Board of Education

The State Board of Education was established in its present form by the Missouri Constitution of 1945. The State Board of Education consists of eight lay citizens appointed by the Governor with advice and consent from the Senate. Article IX, Section 2(a) also states that no more than four members of the Board may belong to the same political party. State Board members are appointed for eight-year terms which are arranged so that only one term expires each year. The Board elects its own officers.

The responsibilities of the State Board of Education extend from preschool through post-secondary and adult education programs. These responsibilities include:

- Establishment of policies for the leadership, service and regulation of public education. These policies are administered by the Missouri Department of Elementary and Secondary Education.
- Operation of the State School for the Blind and the State School for the Deaf.
- Operation of State Schools for Severely Handicapped Children.
- Classification of schools and certification of teachers.
- Administration of vocational education, vocational rehabilitation and veterans' education programs.
- Administration and supervision of programs under the Elementary and Secondary Education Act of 1965 and other Federal programs.
- Apportionment of state moneys.
- Publication of laws relating to schools.
- Collection and publication of information which reflects continuously the condition and management of the state's public schools.

Part I

Report of the Year Completed

The Year in Review

By Arthur L. Mallory
Commissioner of Education

Public education in Missouri achieved a heartening victory during 1982-83: the passage of "Proposition C" by Missouri voters during November 1982. This measure, placed on the ballot through an initiative petition campaign, changed several aspects of the state's school-funding system. The major effect of the new law was to establish a statewide, one-cent sales tax to benefit education.

Approval of Proposition C was truly a landmark event. At a time when most political leaders were asserting that the public was in an "anti-tax mood," 53 percent of Missourians voted for the one-cent sales tax increase. It was a tremendous morale boost for teachers, school officials and other supporters of the measure.

The credit for passage of Proposition C must go, primarily, to Missouri's teachers. The Missouri State Teachers Association (MSTA), specifically spearheaded the campaign to promote Proposition C and to get it on the statewide ballot. While Proposition C was supported strongly by local school boards, education groups, the PTA, the State Board of Education and others, teachers did most of the "legwork" for this extensive campaign. It was not a "big money" campaign. Nonetheless, teachers demonstrated that education remains an important issue with the general public and that education can be a powerful influence at the state level.

The revenue generated by Proposition C could not have come at a better time. Collections of the new sales tax began in January of 1983, with first payments made to school districts in March. Because of state-level budget cuts ordered by Governor Bond in October 1982 (more than $90 million altogether), state financial aid to school districts through the Foundation Program was reduced by $34.3 million for the year. The final state-aid payment of 1982-83 was reduced by an additional $1.3 million because of a shortfall in cigarette tax revenue which helps support the Foundation Program.

During the last four months of 1982-83 (March-June), school districts received $78.6 million as a result of the new one-cent sales tax. One-half of that amount was used to reduce local property tax rates, as required by the law. Thus, schools received $39.3 million in *net* new revenue through Proposition C—barely enough to offset the cutbacks in the Foundation Program.

Missouri's school-funding picture became increasingly complex and confusing during 1982-83, because of the influx of new revenue under Proposition C and because of the uncertainty connected with other sources of state aid. In addition to the reduction in Foundation Program funding, for example, almost $30 million in state textbook aid for local school districts was delayed for three months. The small increase ($12 million) in appropriations for the Foundation Program for 1983-84, approved by the General Assembly in June of 1983, did little to help brighten the outlook for school funding.

School officials and staff of the Department of Elementary and Secondary Education worked hand in hand to implement new procedures required under Proposition C. And while everyone celebrated the passage of Proposition C, the jubilation was cut short by the uncertainty created by cutbacks and delays in existing state aid programs.

All in all, 1982-83 was a tumultuous year for school finance in Missouri.

Education in the Spotlight

In the spring of 1983, education exploded into prominence on the national scene. In April, the National Commission on Excellence in Education (a blue-ribbon panel appointed by U.S. Secretary of Education Terrell Bell), published its "Open Letter to the American People." The commission's report was entitled "A Nation at Risk: The Imperative for Educational Reform." (Because of the historic significance of this report, the full text of "A Nation at Risk" is reprinted in Part II of this annual report.)

"A Nation at Risk" immediately dominated the nation's headlines and airwaves. In a stinging indictment of the failures of schools, the report charged that America's educational system and the very future of the nation are threatened by a "rising tide of mediocrity" in our schools. It called for substantial reforms and triggered a nationwide debate about public education.

The Commission's report, I believe, will prove to be a pivotal event in the history of American education. Not since the 1950s, for example, when the "Sputnik crisis" rocked the education establishment, has education been such a prominent issue in our country. As it turned out, "A Nation at Risk" was only the first of a series of national reports and studies released in 1983. All of these reports emphasized America's reliance on its educational system and called for numerous, sweeping reforms. At the national and state levels, political leaders perceived the new interest in education and made educational reform into an important topic of debate.

While "A Nation at Risk" was critical of public schools in many respects, it was an explicitly "pro-education" document. It put education back on the nation's front burner. Although some were defensive about the report, most educators welcomed the Commission's study because it focused public attention on the need for excellence in education. It prompted widespread public discussion of education issues and, also, brought attention (almost as a sidelight) to many places where schools and teachers are achieving excellence in education.

In my opinion, Missouri is already responding to many of the Commission's recommendations. For example:

- The State Board of Education has emphasized the improvement of basic skills achievement by implementing the Basic Essential Skills Test (BEST). During 1983-84 the Board will determine whether passage of the BEST should be required for graduation.
- The Board has raised the grade point average required of prospective teachers and is preparing to implement an "entry test" for those going into teacher-training programs.
- The Board has worked closely with teachers and with colleges and universities over the past five years to upgrade teacher training and certification requirements.
- During 1982-83, the Board implemented a new evaluation system, including on-site visits, for teacher-training institutions in Missouri.
- The Board has been aggressive in calling for additional state funding for education which would provide for improved and more-competitive salaries for teachers.
- The Board continues to encourage all school districts to adopt an "Instructional Management System" (IMS) as a way of raising expectations and achievement for all pupils.
- During 1983-84, the Board will consider changes in minimum high school graduation standards—one of the major areas of concern addressed in "A Nation at Risk."

Excellence never comes easily, and it will not be easy to achieve in our educational system. Excellence must be our goal, however, because that is what Missourians want and expect. Ultimately, of course, the people must choose the path to excellence and help revitalize what the National Commission on Excellence in Education called "the persistent and authentic American dream that superior performance can raise one's status in life and shape one's future."

The Commission on Excellence has rekindled the kind of interest needed for us to meet the challenge of improving public schools in the 1980s and 1990s. I'm confident Missouri's public schools will meet that challenge.

1982-83 Education Statistics in Brief

Number of Public School Districts	546
Fall Enrollment	
High School Districts K-12	791,554
Elementary Districts (K-8)	11,287
State Total (K-12)	802,841
High School Graduates	56,420
Number of Staff	
Classroom Teachers	45,958
Principals/Assistant Principals	2,396
Superintendents	450
Assistant Superintendents and Other Central Office	681
Other Certificated Staff	4,359
Total of All Staff	53,845
Average Salaries of Staff	
Classroom Teachers	$17,521
Principals/Assistant Principals	27,750
Superintendents	32,977
Assistant Superintendents and Other Central Office	30,969
Other Certificated Staff	19,447
Average of all Staff	18,423
Current Expenditures by Districts	
State Total	$1,721,030,754
Current Expenditures Per Pupil in ADA*	
Elementary Districts	$2,025
High School Districts	2,404
AAA	2,371
AA	2,483
Unclassified	2,519
Total/All Districts	2,396
Average School Tax Levies	
High School Districts	$4.30
Elementary Districts	4.06
Average for All Districts	4.26

Average Daily Attendance

4,000 Participate in 1982 Regional Conferences

About one-third of Missouri's school districts have established or are developing an Instructional Management System (IMS), according to citizens and educators who participated in the 1982 Regional Educational Conferences. Nine conferences, sponsored by the Department of Elementary and Secondary Education, were held across the state during September and October of 1982.

With the theme "Improving Achievement through Instructional Management," the conferences involved about 4,000 citizens, legislators, school board members, administrators, teachers and students. It was a record turnout for conferences, held annually since 1971.

The Regional Conferences were designed to introduce participants to the IMS concept—a priority of the State Board of Education—and its practical implications for students and schools. The Board is encouraging local school districts to adopt the IMS approach as a means of improving student achievement, particularly in the basic skills.

"Along with the many workshops and special programs conducted by the Department for local school personnel, the Regional Conferences are an important way of increasing public understanding of the IMS concept and its purposes," said Commissioner of Education Arthur L. Mallory.

A questionnaire was distributed at each Regional Conference to gather information about participants' perceptions of the IMS concept. The results of the survey also offer some insight into how local school districts are implementing IMS techniques. Following are some highlights of the survey's findings.

•One of the important characteristics of an IMS is a set of written goals and objectives. Overall, two-thirds of the participants said, "Our school has a set of written goals and objectives at least for reading and arithmetic." Only 22% of the respondents, however, said "parents are provided with the reading and arithmetic objectives their children are expected to master."

A record number of citizens and educators—about 4,000—took part in small-group discussions, such as this one at Moberly, during the 1982 Regional Educational Conferences. The conferences focused on "Improving Achievement through Instructional Management."

•Over half the participants said students in their school district could not "tell you which learning objectives they are working on in arithmetic or reading."

•Another feature of an IMS is that schools use progress on established objectives when reporting students' progress to parents. About one-third of the conference participants said their school districts maintain written records about students' progress on objectives and provide such reports for parents. Department officials consider this a significant indicator.

•The greatest variation in perception concerned the amount of time building principals spend visiting classrooms and assisting teachers. More than half the administrators and board members at the Regional Conferences indicated that principals spend "considerable time in the classroom, helping teachers solve instructional problems." Only about 20% of the students and teachers agreed with that statement, though.

•About half the respondents said test results and recommendations for improvements are regularly provided to students and parents, and that changes have been made in teaching or administrative practices as a result of students' performance on learning objectives. This is a positive sign that more schools are using the type of information provided by an IMS to improve instruction.

"The IMS concept is gaining momentum in Missouri, I believe, and many school districts are now in the process of preparing instructional objectives in reading and math so they can implement a management system in the future.

"The Regional Conferences have shown there is strong support for the IMS concept among citizens and educators. IMS is the way to go," said Commissioner Mallory.

Highlights of 1982-83

Bill McLaughlin, a teacher at Central High School in St. Joseph, was named Missouri Teacher of the Year for 1982-83 during October 1982 (see photo). He teaches chemistry in grades 10-12, is chairman of the science department, and serves as teacher/advisor for advanced students in an independent research course called "Science Investigations." Runners-up for statewide Teacher of the Year honors in 1982-83 were: Tom Gallagher, an English teacher (grades 7-12) in the Gallatin R-V School District, and Barbara Ann Knarr, a third and fourth grade teacher at Russell Elementary School in the Hazelwood School District.

Four Missouri high schools were selected for national honor in the first Secondary School Recognition Program conducted by the U.S. Department of Education. Blue Springs High School, Horton Watkins High School (Ladue), Kickapoo High School (Springfield) and Parkway West High School were among 152 outstanding secondary schools across the country that were selected in June, 1983.

In addition to the four winning high schools, Missouri nominated six other schools for the national recognition program. They were: Rock Bridge High School (Columbia), Camdenton Junior High School, Hazelwood Junior High School, Knob Noster Middle School, Ladue Junior High School, and Liberty Junior High School.

The State Board of Education approved new certification requirements for school administrators during its March 1983 meeting at Jefferson City. The new standards become effective Sept. 1, 1986. They apply to superintendents, principals, vocational school directors and special education administrators. The major change included in the new standards is the elimination of permanent, of life, certificates for administrators. Administrators' certificates issued before 1986 will continue to be lifetime certificates.

Charles W. (Bill) McLaughlin, a science/chemistry teacher at Central High School, St. Joseph, was chosen Missouri's Teacher of the Year for 1982-83.

The Missouri School for the Deaf, Fulton, expanded its "Outreach Program" during 1982-83 to provide special services to families with deaf or hearing-impaired preschoolers. Through this project, 11 specially trained "parent advisors" made weekly home visits to 20 families throughout the state. The program concentrates on helping parents become "at-home teachers" for hearing impaired children from birth to age 4. The parent advisors teach sign language and provide tips for parents on how to deal with the day-to-day problems of raising a deaf child.

Nearly 3,000 teachers and other school employees in Missouri public schools lost their jobs during 1982-83 because of the continuing financial crunch. The Department of Elementary and Secondary Education surveyed all school districts in the state during the summer of 1982 in an effort to determine the impact of state and local budget reductions. The survey results were reported to the State Board of Education during September 1982. Nearly 75 percent (407) of all school districts responded to the survey, which showed:

•A total of 2,850 staff positions (1,463 professional and 1,387 support) were eliminated for 1982-83 because of fund shortages.

•A total of 1,013 positions, including teachers and support personnel, were eliminated during the previous year.

•Many school districts trimmed course offerings in order to reduce expenditures.

(continued)

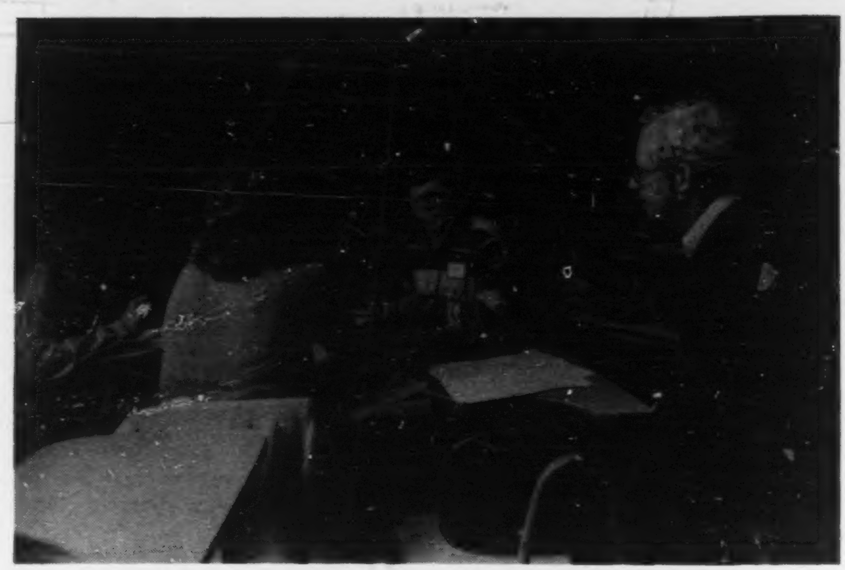
Highlights (continued)

Dr. Gale Bartow, superintendent of the Blue Springs R-IV School District, was sworn in March 19, 1983, as president of the American Association of School Administrators. He will serve a one-year term as leader of the 18,000-member organization.

Twenty-five teachers took part in special "math institutes" during the summer of 1983. The intensive summer-school programs were organized by the Department of Elementary and Secondary Education in cooperation with Northeast Missouri State University (Kirksville) and Southwest Missouri State University (Springfield). The purpose of the 8-week-long institutes was to retain certificated teachers so they are qualified to teach math in grades 7-9.

The math institutes were first organized in 1982 to help deal with the shortage of qualified math teachers in the state.

Nearly 1,000 teachers and school administrators from Missouri and surrounding states took part in three "Microcomputers in Education" conferences conducted by the Department of Elementary and Secondary Education during March of 1983. The two-day sessions were held at Kansas City, St. Louis and Springfield. The conferences were designed to provide practical information and assistance for local schools on how to use microcomputers effectively—either for instructional or administrative functions. The tremendous turnout for the conferences illustrated the fast-growing interest in the use of microcomputers in school districts throughout the state.



Sixty teachers and curriculum specialists from selected school districts spent the weekend of March 4-6, 1983, writing suggested objectives for a model elementary science curriculum. The project was organized by the Department of Elementary and Secondary Education and held at Central Missouri State University, Warrensburg. The suggested science curriculum will be distributed to school districts statewide during the 1983-84 school year.

Carolyn Losos (above), chairman of the Commissioner's Committee on Parents as Teachers, leads a discussion during the group's March 7, 1983, meeting at Jefferson City. The group kicked off its activities the same day with a special luncheon hosted by Gov. Kit Bond. The 30-member committee, appointed by Commissioner of Education Arthur L. Mallory, is made up of leading citizens and educators. The goal of the committee is to emphasize the value of parental involvement in education and to support programs which encourage closer home-school cooperation. One of the committee's first actions was to endorse proposed legislation that would authorize state funding for preschool screening and parent education programs in local school districts.

A team of sixth graders from Chillicothe won national honors during June 1983 in the Future Problem Solving Bowl. In national competition at Cedar Rapids, Iowa (May 30-June 2), the Chillicothe students were required to develop ideas and suggestions on ways of preventing nuclear war. The Future Problem Solving Bowl is a national program, primarily for gifted and talented students, which promotes creative thinking and problem-solving skills.

About 250 teachers and administrators attended three, week-long Leadership Training Institutes sponsored by the Department of Elementary and Secondary Education during the summer of 1982. The programs gave participants (above) a concentrated course in the theory and practice of "Instructional Management"—one of the priorities of the State Board of Education.

Legislation

During 1982, the 82nd Missouri General Assembly (first regular session) enacted a number of bills affecting public education. The most notable legislative action included:

1. A bill requiring school districts, beginning in 1984, to schedule the first day of school after Labor Day. The so-called **"Labor Day Bill"** had been sought by the travel/tourism industry for a number of years in order to prevent school opening from interfering with the vacation season. The bill includes a provision allowing school districts to begin after Labor Day, if necessary, for agricultural purposes.

The Labor Day Bill also included important provisions relating to the length of the school day and the school term. The new law permits school districts to plan a school term with a minimum of 174 days of pupil attendance and with no minimum requirement for the length of each day. The bill also allows districts to plan a school term with at least 150 days providing a minimum of 1,050 hours of instruction and with no school day longer than seven hours.

The State Board of Education did not oppose the after-Labor Day school opening requirement, but it did oppose changes in existing requirements related to the length of the school day and school year—changes which were added by amendment during legislative debate. With the flexibility granted by the Labor Day Bill, school districts could have a school year shorter than 174 days—the previous minimum requirement—while meeting the standard of 1,050 hours of instruction.

2. An important measure related to **property reassessment** was enacted. This bill, required to implement Article 10, Section IV(B), of the Missouri Constitution, defined three classes of property for assessment purposes: residential, agricultural; and utility, industrial, commercial, railroad and other real property. The assessment rates for these different classes of property remain to be established. These rates must be established by the legislature before statewide property reassessment can be completed.

This bill has significant implications for school districts because the state school aid formula is heavily dependent on local property values and tax ratios. Depending on the assessment rates which are established for the new classes of property, the "wealth ranking" of local school districts could change significantly after reassessment.

3. A bill setting a statewide requirement for performance based **evaluation of teachers**. The bill requires the Department of Elementary and Secondary Education to develop suggested procedures which can be used by all school districts in evaluating classroom teachers.

4. A bill clarifying several sections of **Propostition C**, the law approved by voters in November 1982 to create a one-cent sales tax for education. Correcting an oversight in the original measure, the bill specifies that special school districts and districts with pupils residing on federal property shall be eligible to receive sales tax revenue. This bill also clarified language concerning the requirement that 75 percent of one-half of net sales tax revenue received by school districts must be placed in the teachers fund of each district.

5. A bill concerning **attendance by local school board members**. Under this law, school board members who miss three consecutive meetings for reasons not acceptable to their boards will automatically vacate their positions.

Priorities of the State Board of Education

Annually, the State Board of Education adopts a set of priorities—topics which emphasize the Board's current concerns and provide direction for the Commissioner of Education and staff of the Department of Elementary and Secondary Education. Priorities adopted by the Board for 1982-83 were:

1. Instructional Management Systems (IMS).
2. Basic Skills.
3. Vocational Education.
4. Teachers' Salaries and School Finance.
5. Early Childhood Education.
6. Academic Achievement and Cost Effectiveness.

Priorities 1 through 5 are the same as what the Board adopted in 1981. Members of the Board added "Academic Achievement and Cost Effectiveness" to last year's list. Following is a brief overview and explanation of the Board's priorities:

1. Instructional Management Systems.

An Instructional Management System (IMS) is a practical means of defining specific objectives for teaching and reporting students' progress in terms of those objectives. Since IMS was adopted as a priority by the Board in 1981, many school districts in the state have begun implementing the IMS concept. The Board encourages all school districts to adopt the IMS approach—particularly in the basic skill areas. The 1982 Regional Educational Conferences reflect the Board's continuing emphasis on this topic.

2. Basic Skills.

Improving student achievement in the basic skills has been a top priority of the State Board of Education since 1976. The implementation of Basic Essential Skills Test (BEST) at the eighth grade level is perhaps the strongest illustration of the Board's interest in this area. The Board believes basic skills should remain a priority at the state level because of the continuing public concern about basic academic achievement in public schools.

3. Vocational Education.

Currently, nearly a quarter of a million students and adults are being served by vocational education programs in Missouri, and that number is expected to grow in the future. Projections indicate the greatest demand for vocational training in the future will be among adults, although the percentage of secondary students wanting vocational training should continue to rise. Assuring adequate personnel, facilities and equipment for a growing vocational education system is a state-level priority because of the importance of vocational training for Missouri's economic growth and development. The Board also encourages local schools to work more closely with business and industry in planning and providing new training opportunities which will meet the changing needs of industry and of adult workers.

4. Teachers' Salaries and School Finance.

A year ago, in keeping with this priority, the Board called for a three-year effort to boost state aid for local schools by about $350 million. This proposal included a request for an increase of almost $102 million in the foundation program during 1982-83 as the "first installment" of the three-year program. The plan recommended by the Board has three initial goals: (1) to raise Missouri's average salary for teachers to the national average; (2) to increase the State's share of funding for current educational costs; and (3) to maintain pupil/teacher ratios at their current levels.

Because of the poor economic situation at the state level, appropriations for the foundation program for the current year were increased by only $26 million. Therefore, the Board will continue its efforts to promote increased appropriations for the foundation program (75 percent of which must be spent for teachers' salaries) and to emphasize the necessity for adequate salaries which will attract and retain quality classroom teachers in Missouri.

5. Early Childhood Education.

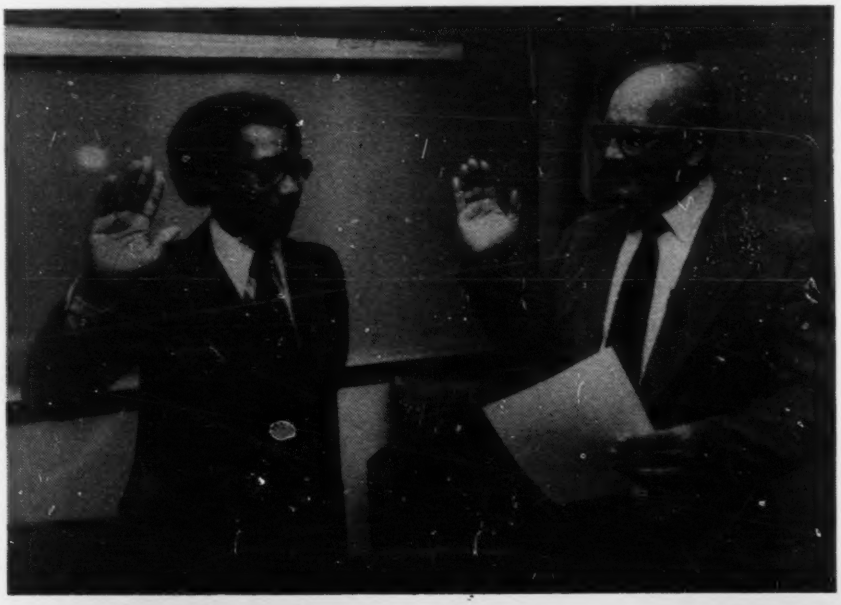
The Department of Elementary and Secondary Education has emphasized early childhood education for the past decade—providing state-level leadership activities and as well as working with local programs for children and parents. Research has definitely shown that early childhood and parent education programs can lead to high academic achievement by students, significant reductions in the need for special education and increased cooperation among parents and educators.

During the past year, the Department initiated a unique effort, in cooperation with several local school districts, to demonstrate effective approaches for early childhood education. One of these projects, under the leadership of Dr. Burton White, an acknowledged authority on early childhood development, emphasizes services to help parents be more effective as "first teachers" for their children. The other project, in cooperation with Dr. David Weikart, is designed to help local schools implement Weikart's highly effective curriculum for "high-risk" preschoolers. The Department is continuing financial support for these projects.

6. Academic Achievement and Cost Effectiveness.

Learning (academic achievement) is the "bottom line" for schools. Inevitably, however, there is a financial "bottom line"—one which is becoming increasingly significant as schools struggle with rising costs and shrinking budgets. As a result, schools are setting new priorities, eliminating some services and concentrating on those programs and activities which contribute to better academic achievement.

In many ways, this priority embraces the others adopted by the Board. Because of cutback in federal funding and slow growth in other revenues, for example, schools must find more efficient ways of operating. The goal of cutting expenses, however, cannot overshadow the necessity of maintaining and improving academic achievement. Therefore, the State Board of Education will promote programs and activities which it believes will contribute to greater cost effectiveness and improved achievement. Two examples of such programs are the IMS concept and early childhood education.

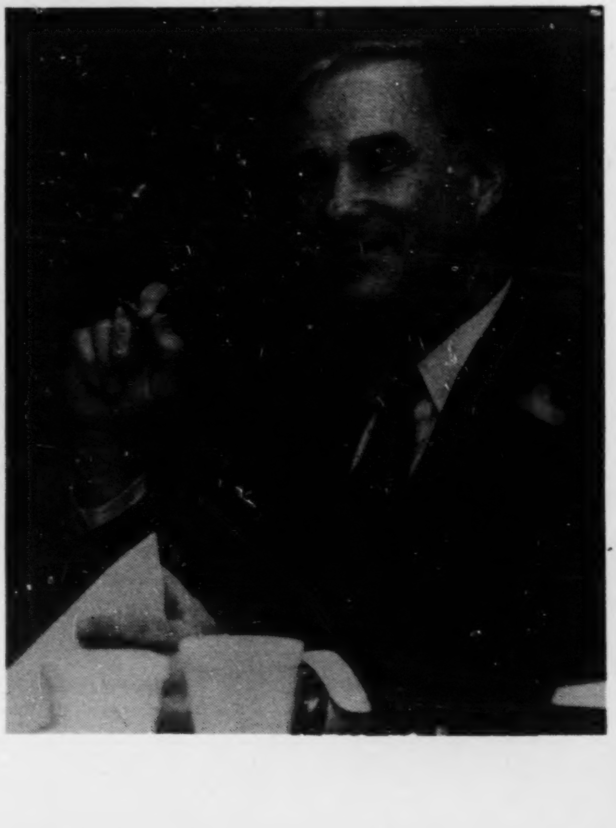


New Members Join Board of Education

Three new members joined the State Board of Education during 1982-83—and all within a two-week span.

Donald E. West (far left), was sworn in March 30, 1983. He is a hospital administrator from St. Louis. He replaced Irving A. Williamson of St. Louis. **Delmar A. Cobble**, Jackson, president of the Board during 1982-83, is shown here administering the oath to Mr. West. **Dan L. Blackwell** (below), of Lee's Summit, also joined the State Board of Education in February. Dr. Blackwell is an orthodontist and former member of the Lee's Summit Board of Education. He replaced Dale M. Thompson of Kansas City.

Roseann Bentley (above), of Springfield, was sworn in Feb. 24. She is a former teacher and member of the Springfield Board of Education. Mrs. Bentley replaced Donald W. Shelton.



Part II

Following is the complete text of the report of the National Commission on Excellence in Education. Released in April 1983, it created a tremendous surge of national publicity and interest about public education and needed reforms. The Department of Elementary and Secondary Education reprinted the report in its Magazine, *Missouri Schools*, and distributed it to all school districts in the state. School district personnel were encouraged to study the report and use its findings as the basis for local efforts to improve learning and teaching.

"A Nation At Risk" was the first of several major reports released in 1983 calling for major changes and improvements in education. It triggered widespread response at the state and local levels in Missouri and prompted renewed interest in educational issues. Some school districts, for example, established their own "commissions on excellence" to study the report and make recommendations for local school improvement activities.

Publication of "A Nation At Risk" was one of the major events in education during the 1982-83 school year, both in Missouri and across the nation.

An Open Letter to the American People

A Nation At Risk:

The Imperative for Educational Reform

The Final Report of the National Commission on Excellence in Education.

Our Nation is at risk. Our once unchallenged preeminence in commerce, industry, science, and technological innovation is being overtaken by competitors throughout the world. This report is concerned with only one of the many causes and dimensions of the problem, but it is the one that undergirds American prosperity, security, and civility. We report to the American people that while we can take justifiable pride in what our schools and colleges have historically accomplished and contributed to the United States and the well-being of its people, the educational foundations of our society are presently being eroded by a rising tide of mediocrity that threatens our very future as a nation and a people. What was unimaginable a generation ago has begun to occur—others are matching and surpassing our educational attainments.

If an unfriendly foreign power had attempted to impose on America the mediocre educational performance that exists today, we might well have viewed it as an act of war. As it stands, we have allowed this to happen to ourselves. We have even squandered the gains in student achievement made in the wake of the Sputnik challenge. Moreover, we have dismantled essential support systems which helped make those gains possible. We have, in effect, been commiting an act of unthinking, unilateral educational disarmament.

Our society and its educational institutions seem to have lost sight of the basic purpose of schooling, and of the high expectations and disciplined effort needed to attain them. This report, the result of 18 months of study, seeks to generate reform of our educational system in fundamental ways and to renew the nation's commitment to schools and colleges of high quality throughout the length and breadth of our land.

That we have compromised this commitment is, upon reflection, hardly surprising, given the multitude of often conflicting demands we have placed on our nation's schools and colleges. They are routinely called on to provide solutions to personal, social, and political problems that the home and other institutions either will not or cannot resolve. We must understand that these demands on our schools and colleges often exact an educational cost as well as a financial one.

On the occasion of the Commission's first meeting, President Reagan noted the central importance of education in American life when he said: "Certainly there are few areas of American life as important to our society, to our people, and to our families as our schools and colleges." This report, therefore, is as much an open letter to the American people as it is a report to the Secretary of Education. We are confident that the American people, properly informed, will do what is right for their children and for the generations to come.

The Risk

History is not kind to idlers. The time is long past when America's destiny was assured simply by an abundance of natural resources and inexhaustible human enthusiasm, and our relative isolation from the malignant problems of older civilizations. The world is indeed one global village. We live among determined, well-educated, and stongly motivated competitors. We compete with them for international standing and markets, not only with products but also with the ideas of our laboratories and neighborhood workshops. America's position in the world may once have been reasonably secure with only few exceptionally well-trained men and women. It is no longer.

The risk is not only that the Japanese make automobiles more efficiently than Americans and have government subsidies for development and export. It is not just that the South Koreans recently built the world's most efficient steel mill, or that American machine tools, once the pride of the world are being displaced by German products. It is also that these developments signify a redistribution of trained capability throughout the globe. Knowledge, learning, information, and skilled intelligence are the new raw materials of international commerce and are today spreading throughout the world as vigorously as miracle drugs, synthetic fertilizers, and blue jeans did earlier. If only to keep and improve on the slim competitive edge we will retain in world markets, we must rededicate ourselves to the reform of our educational system for the benefit of all—old and young alike, affluent and poor, majority and minority. Learning is the indispensable investment required for success in the "information age" we are entering.

Our concern, however, goes well beyond matters such as industry and commerce. It also includes the intellectual, moral, and spiritual strengths or our people which knit together the very fabric or our society. The people of the United States need to know that individuals in our society who do not possess the levels of skill, literacy, and training essential to this new era will be effectively disenfranchised, not simply from the material rewards that accompany competent performance, but also from the chance to participate fully in our national life. A high level of shared education is essential to a free, democratic society and to the fostering of a common culture, especially in a country that prides itself on pluralism and individual freedom.

For our country to function, citizens must be able to reach some common understandings on complex issues, often on short notice and on the basis of conflicting or incomplete evidence. Education helps form these common understandings, a point Thomas Jefferson made long ago in his justly famous dictum:

> *I know no safe depository of the ultimate powers of the society but the people themselves; and if we think them not enlightened enough to exercise their control with a wholesome discretion, the*

> *remedy is not to take it from them but to inform their discretion.*

Part of what is at risk is the promise first made on this continent: All, regardless of race or class or economic status, are entitled to a fair chance and to the tools for developing their individual powers of mind and spirit to the utmost. This promise means that all children by virtue of their own efforts, competently guided, can hope to attain the mature and informed judgment needed to secure gainful employment and to manage their own lives, thereby serving not only their own interests but also the progress of society itself.

Indicators of the Risk

The educational dimensions of the risk before us have been amply documented in testimony received by the Commission. For example:

- International comparisons of student achievement, completed a decade ago, reveal that on 19 academic tests American students were never first or second and, in comparison with other industrialized nations, were last seven times.
- Some 23 million American adults are functionally illiterate by the simplest tests of everyday reading, writing, and comprehension.
- About 13 percent of all 17-year-olds in the United States can be considered functionally illiterate. Functional illiteracy among minority youth may run as high as 40 percent.
- Average achievement of high-school students on most standardized tests is now lower than 26 years ago when Sputnik was launched.
- Over half the population of gifted students do not match their tested ability with comparable ability in school.
- The College Board's Scholastic Aptitude Tests (S.A.T.) demonstrate a virtually unbroken decline from 1963 to 1980. Average verbal scores fell over 50 points and average mathematics scores dropped nearly 40 points.
- College Board achievement tests also reveal consistent declines in recent years in such subjects as physics and English.
- Both the number and proportion of students demonstrating superior achievement on the S.A.T.'s (i.e. those with scores of 650 or higher) have dramatically declined.
- Many 17-year-olds do not possess the "higher order" intellectual skills we should expect of them. Nearly 40 percent cannot draw inferences from written material; only one-fifth can write a persuasive essay; and only one-third can solve a mathematics problem requiring several steps.
- There was a steady decline in science-achievement scores of U.S. 17-year-olds as measured by national assessments of science in 1969, 1973, and 1977.
- Between 1975 and 1980, remedial mathematics courses in public four-year colleges increased by 72 percent and now constitute one-quarter of all mathematics courses taught in those institutions.
- Average tested achievement of students graduating from college is also lower.
- Business and military leaders complain that they are required to spend millions of dollars on costly remedial education and training programs in such basic skills as reading, writing, spelling, and computation. The Department of the Navy, for example, reported to the Commission that one-quarter of its recent recruits cannot read at the ninth-grade level, the minimum needed simply to understand written safety instructions. Without remedial work they cannot even begin, much less complete, the sophisticated training essential in much of the modern military.

These deficiencies come at a time when the demand of highly skilled workers in new fields is accelerating rapidly. For example:

- Computers and computer-controlled equipment are penetrating every aspect of our lives—homes, factories, and offices.
- One estimate indicates that by the turn of the century millions of jobs will involve laser technology and robotics.
- Technology is radically transforming a host of other occupations. They include health care, medical science, energy production, food processing, construction, and the building, repair, and maintenance of sophisticated scientific, educational, military, and industrial equipment.

Analysts examining these indicators of student performance and the demands for new skills have made some chilling observations. Educational researcher Paul Hurd concluded at the end of a thorough national survey of student achievement that within the context of the modern scientific revolution "we are raising a new generation of Americans that is scientifically and technologically illiterate." In a similar view, John Slaughter, a former director of the National Science Foundation, warned of "a growing chasm between a small scientific and technological elite and a citizenry ill-informed, indeed uninformed, on issues with a science component."

But the problem does not stop there, nor do all observers see it the same way. Some worry that schools may emphasize such rudiments as reading and computation at the expense of other essential skills such as comprehension, analysis, solving problems, and drawing conclusions. Still others are concerned that an over-emphasis on technical and occupational skills will leave little time for studying the arts and humanities that so enrich daily life, help maintain civility, and develop a sense of community. Knowledge of the humanities, they maintain, must be harnessed to science and technology if the latter are to remain creative and humane, just as the humanities need to be informed by science and technology if they are to remain relevant to the human condition. Another analyst, Paul Copperman, has drawn a sobering conclusion. Until now, he has noted:

> *Each generation of Americans has outstripped its parents in education, in literacy, and in economic attainment. For the first time in the history of our country, the educational skills of one generation will not surpass, will not equal, will not even approach, those of their parents.*

It is important, of course, to recognize that *the average citizen* today is better educated and more knowledgeable than the average citizen of a generation ago—more literate, and exposed to more mathematics, literature, and science. The positive impact of this fact on the well-being of our country and the lives of our people cannot be overstated. Nevertheless, *the average graduate* of our schools and colleges today is not as well-educated as the average graduate of 25 or 35 years ago, when a much smaller proportion of our population completed high school and college. The negative impact of this fact likewise cannot be overstated.

Hope and Frustration

Statistics and their interpretation by experts show only the surface dimension of the difficulties we face. Beneath them lies a tension between hope and frustration that characterizes current attitudes about education at every level.

We have heard the voices of high school and college students, school-board members, and teachers; of leaders of industry, minority groups, and higher education; of parents and state officials. We could hear the hope evident in their commitment to quality education and in their descriptions of outstanding programs and schools. We could also hear the intensity of their frustration, a growing impatience with shoddiness in many walks of American life, and the complaint that this shoddiness is too often reflected in our schools and colleges. Their frustration threatens to overwhelm their hope.

What lies behind this emerging national sense of frustration can be described as both a dimming of personal expectations and the fear of losing a shared vision for America.

On the personal level, the student, the parent, and the caring teacher all perceive that a basic promise is not being kept. More and more young people emerge from high school ready neither for college nor for work. This predicament becomes more acute as the knowledge base continues its rapid expansion, the number of traditional jobs shrinks, and new jobs demand greater sophistication and preparation.

On a broader scale, we sense that this undertone of frustration has significant political implications, for it cuts across ages, generations, races, and political and economic groups. We have come to understand that the public will demand that educational and political leaders act forcefully and effectively on these issues. Indeed, such demands have already appeared and could well become a unifying national preoccupation. This unity, however, can be achieved only if we avoid the unproductive tendency of some to search for scapegoats among the victims, such as the beleaguered teachers.

On the positive side is the significant movement by political and educational leaders to search for solutions—so far centering largely on the nearly desperate need for increased support for the teaching of mathematics and science. This movement is but a start on what we believe is a larger and more educationally encompassing need to improve teaching and learning in fields such as English, history, geography, economics, and foreign languages. We believe this movement must be broadened and directed toward reform and excellence throughout education.

Excellence in Education

We define "excellence" to mean several related things. At the level of the *individual learner*, it means performing on the boundary of individual ability in ways that test and push back personal limits, in school and in the workplace. Excellence characterizes a *school or college* that sets high expectations and goals for all learners, then tries in every way possible to help students reach them. Excellence characterizes a *society* that has adopted these policies, for it will then be prepared through the education and skill of its people to respond to the challenges of a rapidly changing world. Our nation's people and its schools and colleges must be commited to achieving excellence in all these senses.

We do not believe that a public commitment to excellence and educational reform must be made at the expense of a stong, public commitment to the equitable treatment of our diverse population. The twin goals of equity and high-quality schooling have profound and practical meaning for our economy and society, and we cannot permit one to yield to the other either in principle or practice. To do so would deny young people their chance to learn and live according to their aspirations and abilities. It would also lead to a generalized accommodation to mediocrity in our society on the one hand or the creation of an undemocratic elitism on the other.

Our goal must be to develop the talents of all to their fullest. Attaining that goal requires that we expect and assist all students to work to the limits of their capabilities. We should expect schools to have genuinely high standards rather than minimum ones, and parents to support and encourage their children to make the most of their talents and abilities.

The search for solutions to our educational problems must also include a commitment to life-long learning. The task of rebuilding our system of learning is enormous and must be properly understood and taken seriously: Although a million and a half new workers enter the economy each year from our schools and colleges, the adults working today will still make up about 75 percent of the workforce in the year 2000. These workers, and new entrants into the workforce, will need further education and retraining if they—and we as a nation—are to thrive and prosper.

The Learning Society

In a world of ever-accelerating competition and change in the conditions of the workplace, of ever-greater danger, and of ever-larger opportunities for those prepared to meet them, educational reform should focus on the goal of creating a learning society. At the heart of such a society is the commitment to a set of values and to a system of education that affords all members the opportunity to stretch their minds to full capacity, from early childhood through adulthood, learning more as the world itself changes. Such a society has as a basic foundation the idea that education is important not only because of what it contributes to one's career goals but also because of the value it adds to the general quality of one's life. Also at the heart of the learning society are educational opportunities extending far beyond the traditional institutions of learning, our schools and colleges. They extend into homes and workplaces; into libraries, art galleries, museums, and science centers; indeed, into every place where the individual can develop and mature in work and life. In our view, formal schooling in youth is the essential foundation for learning throughout one's life. But without life-long learning, one's skills will become rapidly dated.

In contrast to the ideal of the learning society, however, we find that for too many people education means doing the minimum work necessary for the moment, then coasting through life on what they have learned in its first quarter. But this should not surprise us because we tend to express our educational standards and expectations largely in terms of "minimum requirements." And where there should be a coherent continuum of learning, we have none, but instead an often incoherent, outdated, patchwork quilt. Many individual, sometimes heroic, examples of schools and colleges of great merit do exist. Our findings and testimony confirm the vitality of a number of notable schools and programs, but their very distinction stands out against a vast mass shaped by tensions and pressures that inhibit systematic academic and vocational achievement for the majority of students. In some metropolitan areas basic literacy has become the goal rather than the starting point. In some colleges maintaining enrollment is of greater day-to-day concern than maintaining rigorous academic standards. And the ideal of academic excellence as the primary goal of schooling seems to be fading across the board in American education.

Thus, we issue this call to all who care about America and its future: to parents and students; to teachers, administrators, and school-board members; to colleges and industry; to union members and military leaders; to governors and state legislators; to the President; to members of Congress and other public officials; to members of learned and scientific societies; to the print and electronic media; to concerned citizens everywhere. America is at risk.

We are confident that America can address this risk. If the tasks we set forth are initiated now and our recommendations are fully realized over the next several years, we can expect reform of our nation's schools, colleges, and universities. This would also reverse the current declining trend—a trend that stems more from weakness of purpose, confusion of vision, underuse of talent, and lack of leadership, than from conditions beyond our control.

The Tools at Hand

It is our conviction that the essential raw materials needed to reform our educational system are waiting to be mobilized through effective leadership:

- the natural abilities of the young that cry out to be developed and the undiminished concern of parents for the well-being of their children;
- the commitment of the nation to high retention rates in schools and colleges and to full access to education for all;
- the persistent and authentic American dream that superior performance can raise one's status in life and shape one's own future;
- the dedication, against all odds, that keeps teachers serving in schools and colleges, even as the rewards diminish;
- the ingenuity of our policymakers, scientists, state and local educators, and scholars in formulating solutions once problems are better understood;
- the traditional belief that paying for education is an investment in ever-renewable human resources that are more durable and flexible than capital plant and equipment, and availability in this country of sufficient financial means to invest in education;

- the equally sound tradition, from the Northwest Ordinance of 1787 until today, that the federal government should supplement state, local, and other resources to foster key national educational goals; and
- the voluntary efforts of individuals, businesses, and parent and civic groups to cooperate in strengthening educational groups.

These raw materials, combined with the unparalleled array of educational organizations in America, offer us the possibility to create a learning society, in which public, private, and parochial schools; colleges and universities; vocational and technical schools and institutes; libraries; science centers, museums, and other cultural institutions; and corporate training and retraining programs offer opportunities and choices for all to learn throughout life.

The Public's Commitment

Of all the tools at hand, the public's support for education is the most powerful. In a message to a National Academy of Sciences meeting in May 1982, President Reagan commented on this fact when he said:

> *This public awareness—and I hope public action—is long overdue. . .This country was built on American respect for education. . .Our challenge now is to create a resurgence of that thirst for education that typifies our nation's history.*

The most recent (1982) Gallup Poll of the *Public's Attitudes Toward the Public Schools* strongly supported a theme heard during our hearings: People are steadfast in their belief that education is the major foundation for the future strength of this country. They even considered education more important than developing the best industrial system or the strongest military force, perhaps because they understood education as the cornerstone of both. They also held that education is "extremely important" to one's future success, and that public education should be the top priority for additional federal funds. Education occupied first place among 12 funding categories considered in the survey—above health care, welfare, and military defense, with 55 percent selecting public education as one of their first three choices. Very clearly, the public understands the primary importance of education as the foundation for a satisfying life, an enlightened and civil society, a stong economy, and a secure nation.

At the same time, the public has no patience with undemanding and superfluous high-school offerings. In another survey, more than 75 percent of all those questioned believed every student planning to go to college should take four years of mathematics, English, history/U.S. government, and science, and more than 50 percent adding two years each of a foreign language and economics or business. The public even supports requiring much of this curriculum for students who do not plan to go to college. These standards far exceed the strictest high-school graduation requirements of any state today, and they also exceed the admission standards of all but a handful or our most selective colleges and universities.

Another dimension of the public's support offers the prospect of constuctive reform. The best term to characterize it may simply be the honorable word "patriotism." Citizens know intuitively what some of the best economists have shown in their research, that education is one of the chief engines of a society's material well-being. They know, too, that education is the common bond of a pluralistic society and helps tie us to other cultures around the globe. Citizens also know in their bones that the safety of the United States depends principally on the wit, skill, and spirit of a self-confident people, today and tomorrow. It is, therefore, essential—especially in a period of long-term decline in educational achievement—for government at all levels to affirm its responsibility for nurturing the nation's intellectual capital.

And perhaps most important, citizens know and believe that the meaning of America to the rest of the world must be something better than it seems to many today. Americans like to think of this nation as the preeminent country for generating the great ideas and material benefits for mankind. The citizen is dismayed at a steady 15-year decline in industrial productivity, as one great American industry after another falls to world competition. The citizen wants the country to act on the belief, expressed in our hearings and by the large majority in the Gallup Poll, that education should be at the top of the nation's agenda.

We conclude that declines in educational performance are in large part the result of disturbing inadequacies in the way the educational process itself is often conducted. The findings that follow, culled from a much more extensive list, reflect four important aspects of the educational process: content, expectations, time, and teaching.

Findings Regarding Content

By content we mean the very "stuff" of education, the curriculum. Because of our concern about the curriculum, the Commission examined patterns of courses high-school students took in 1964-69 compared with course patterns in 1976-81. On the basis of these analyses we conclude:

- Secondary-school curricula have been homogenized, diluted, and diffused to the point that they no longer have a central purpose. In effect, we have a cafeteria-style curriculum in which the appetizers and desserts can easily be mistaken for the main courses. Students have migrated from vocational and college-preparatory programs to "general-track" courses in large numbers. The proportion of students taking a general program of study has increased from 12 percent in 1964 to 42 percent in 1979.
- This curricular smorgasbord, combined with extensive student choice, explains a great deal about where we find ourselves today. We offer intermediate algebra, but only 31 percent of our recent high-school graduates complete it; we offer French I but only 13 percent complete it; and we offer geography, but only 16 percent complete it. Calculus is available in schools enrolling about 60 percent of all students, but only 6 percent of all student complete it.
- Twenty-five percent of the credits earned by general-track high-school students are in physical and health education, work experience outside the school, remedial English and mathematics, and personal-service and development courses, such as training for adulthood and marriage.

Findings Regarding Expectations

We define expectations in terms of the level of knowledge, abilities, and skills school and college graduates should possess. They also refer to the time, hard work, behavior, self-discipline, and motivation that are essential for high student achievement. Such expectations are expressed to students in several different ways:

- by grades, which reflect the degree to which students demonstrate their mastery of subject matter.
- through high-school and college graduation requirements, which tell students which subjects are most important;
- by college-admissions requirements, which reinforce high-school standards; and
- by the difficulty of the subject matter students confront in their texts and assigned readings.

Our analyses in each of these areas indicate notable deficiencies:

- The amount of homework for high-school seniors has decreased (two-thirds report less than one hour a night) and grades have risen as average student achievement has been declining.
- In many other industrialized nations, courses in mathematics (other than arithmetic or general mathematics), biology, chemistry, physics, and geography start in grade 6 and are required of *all* students. The time spent on these subjects, based on class hours, is about three times that spent by even the most science-oriented U.S. students, i.e., those who select four years of science and mathematics

in secondary school.

- A 1980 state-by-state survey of high-school diploma requirements reveals that only eight states require high schools to offer foreign-language instruction, but none requires students to take the courses. Thirty-five states require only one year of mathematics and 36 require only one year of science for a diploma.
- In 13 states, 50 percent or more of the units required for high-school graduation may be electives chosen by the student. Given this freedom to choose the substance of half or more of their education, many students opt for less demanding personal-service courses, such as bachelor living.
- "Minimum-competency" examinations (now required in 37 states) fall short of what is needed, as the "minimum" tends to become the "maximum," thus lowering educational standards for all.
- One-fifth of all four-year public colleges in the United States must accept every high-school graduate within the state regardless of program followed or grades, thereby serving notice to high-school students that they can expect to attend college even if they do not follow a demanding course of study in high school or perform well.
- About 23 percent of our more selective colleges and universities reported that their general level of selectivity declined during the 1970's, and 29 percent reported reducing the number of specific high-school courses required for admission (usually by dropping foreign-language requirements, which are now specified as a condition for admission by only one-fifth of our institutions of higher education).
- A recent study by Educational Products Information Exchange revealed that a majority of students were able to master 80 percent of the material in some of their subject-matter texts before they had even opened the books. Many books do not challenge the students to whom they are assigned.
- Expenditures for textbooks and other instructional materials have declined by 50 percent over the past 17 years. While some recommend a level of spending on texts of between 5 and 10 percent of the operating costs of schools, the budgets for basal texts and related material have been dropping during the past decade and a half to only 0.7 percent today.

Findings Regarding Time

Evidence presented to the Commission demonstrates three disturbing facts about the use that American schools and students make of time: (1) compared to other nations, American students spend much less time on school work; (2) time spent in the classroom and on homework is often used ineffectively; and (3) schools are not doing enough to help students develop either the study skills required to use time well or the willingness to spend more time on school work.

- In England and other industrialized countries, it is not unusual for academic high-school students to spend eight hours a day at school, 220 days per year. In the United States, by contrast, the typical school day lasts six hours and the school year is 180 days.
- In many schools, the time spent learning how to cook and drive counts as much toward a high-school diploma as the time spent studying mathematics, English, chemistry, U.S. history, or biology.
- A study of the school week in the United States found that some schools provided students only 17 hours of academic instruction during the week, and the average school provided about 22.
- A California study of individual classrooms found that because of poor management of classroom time, some elementary students received only one-fifth of the instruction others received in reading comprehension.
- In most schools, the teaching of study skills is haphazard and unplanned. Consequently, many students complete high school and enter college without disciplined and systematic study habits.

Findings Regarding Teaching

The Commission found that not enough of the academically able students are being attracted to teaching; that the professional working life of teachers is on the whole unacceptable; and that a serious shortage of teachers exists in key fields.

- Too many teachers are being drawn from the bottom quarter of graduating high-school and college students.
- The teacher-preparation curriculum is weighted heavily with courses in "educational methods" at the expense of courses in subjects to be taught. A survey of 1,350 institutions training teachers indicated that 41 percent of the time of elementary-school teacher candidates is spent in education courses, which reduces the amount of time available for subject-matter courses.
- The average salary after 12 years of teaching is only $17,000 per year, and many teachers are required to supplement their income with part-time and summer employment. In addition, individual teachers have little influence in such critical professional decisions as, for example, textbook selection.
- Despite widespread publicity about an overpopulation of teachers, severe shortages of certain kinds of teachers exist: in the fields of mathematics, science, and foreign languages; and among specialists in education for gifted and talented, language-minority, and handicapped students.
- The shortage of teachers in mathematics and science is particularly severe. A 1981 survey of 45 states revealed shortages of mathematics teachers in 43 states, critical shortages of earth-science teachers in 33 states, and of physics teachers everywhere.
- Half of the newly employed mathematics, science, and English teachers are not qualified to teach these subjects; fewer than one-third of U.S. high schools offer physics taught by qualified teachers.

Recommendations

In light of the urgent need for improvement, both immediate and long-term, this Commission has agreed on a set of recommendations that the American people can begin to act on now, that can be implemented over the next several years, and that promise lasting reform. The topics are familiar; there is little mystery about what we believe must be done. Many schools, districts, and states are already giving serious and constructive attention to these matters, even though their plans may differ from our recommendations in some details.

We wish to note that we refer to public, private, and parochial schools and colleges alike. All are valuable national resources. Examples of actions similar to those recommended below can be found in each of them.

We must emphasize that the variety of student aspirations, abilities, and preparation requires that appropriate content be available to satisfy diverse needs. Attention must be directed to both the nature of the content available and to the needs of particular learners. The most gifted students, for example, may need a curriculum enriched and accelerated beyond even the needs of other students of high ability. Similarly, educationally disadvantaged students may require special curriculum materials, smaller classes, or individual tutoring to help them master the material presented. Nevertheless, there remains a common expectation: We must demand the best effort and performance from all students, whether they are gifted or less able, affluent or disadvantaged, whether destined for college, the farm, or industry.

Our recommendations are based on the beliefs that everyone can learn, that everyone is born with an *urge* to learn which can be nurtured, that a solid high-school education is within the reach of virtually all, and that life-long learning will equip people with the skills required for new careers and for citizenship.

Recommendation A: Content

We recommend that state and local high-school graduation requirments be strengthened and that, *at a minimum, all* students seeking a diploma be required to lay the foundations in the Five New Basics by taking the following curriculum during their four years of high school: (a) four years of English; (b) three years of mathematics; (c) three years of science; (d) three years of social studies; and (e) one-half year of computer science. For the college-bound, two years of foreign language in high school are strongly recommended in addition to those taken earlier.

Whatever the student's educational or work objectives, knowledge of the New Basics is the foundation of success for the after-school years, and therefore forms the core of the modern curriculum. A high level of shared education in these Basics, together with work in the fine and performing arts and foreign languages, constitutes the mind and spirit of our culture. The following implementing recommendations are intended as illustrative descriptions. They are included here to clarify what we mean by the essentials of a stong curriculum.

Implementing Recommendations

1. The teaching of *English* in high school should equip graduates to: (a) comprehend, interpret, evaluate, and use what they read; (b) write well-organized, effective papers; (c) listen effectively and discuss ideas intelligently; and (d) know our literary heritage and how it enhances imagination and ethical understanding, and how it relates to the customs, ideas, and values of today's life and culture.

2. The teaching of *mathematics* in high school should equip graduates to: (a) understand geometric and algebraic concepts; (b) understand elementary probability and statistics; (c) apply mathematics in everyday situations; and (d) estimate, approximate, measure, and test the accuracy of their calculations. In addition to the traditional sequence of studies available for college-bound students, new, equally demanding mathematics curricula need to be developed for those who do not plan to continue their formal education immediately.

3. The teaching of *science* in high school should provide graduates with an introduction to: (a) the concepts, laws, and processes of the physical and biological sciences; (b) the methods of scientific inquiry and reasoning; (c) the application of scientific knowledge to everyday life; and (d) the social and environmental implications of scientific and technological development. Science courses must be revised and updated for both the college-bound and those not intending to go to college. An example of such work is the American Chemical Society's "Chemistry in the Community" program.

4. The teaching of *social studies* in high school should be designed to: (a) enable students to fix their places and possibilities within the larger social and cultural structure; (b) understand the broad sweep of both ancient and contemporary ideas that have shaped our world; (c) understand the fundamentals of how our economic system works and how our political system functions; and (d) grasp the difference between free and repressive societies. An understanding of each of these areas is requisite to the informed and committed exercise of citizenship in our free society.

5. The teaching of *computer science* in high school should equip graduates to: (a) understand the computer as an information, computation, and communication device; (b) use the computer in the study of the other Basics and for personal and work-related purposes; and (c) understand the world of computers, electronics, and related technologies.

In addition to the New Basics, other important curriculum matters must also be addressed.

6. Achieving proficiency in a *foreign language* ordinarily requires from four to six years of study and should, therefore, be started in the elementary grades. We believe it is desirable that students achieve such proficiency because study of a foreign language introduces students to non-English speaking cultures, heightens awareness and comprehension of one's native tongue, and serves the nation's needs in commerce, diplomacy, defense, and education.

7. The high-school curriculum should also provide students with programs requiring rigorous effort in subjects that advance students' personal, educational, and occupational goals, such as the fine and performing arts and vocational education. These areas complement the New Basics, and they should demand the same level of performance as the Basics.

8. The curriculum in the crucial eight grades leading to the high-school years should be specifically designed to provide a sound base for study in those and later years in such areas as English-language development and writing, computational and problem-solving skills, science, social studies, foreign language, and the arts. These years should foster enthusiasm for learning and the development of the individual's gifts and talents.

9. We encourage the continuation of efforts by groups such as the American Chemical Society, the American Association for the Advancement of Science, the Modern Language Association, and the National Councils of Teachers of English and Teachers of Mathematics, to revise, update, improve, and make available new and more diverse curricular materials. We applaud the consortia of educators and scientific, industrial, and scholarly societies that cooperate to improve the school curriculum.

Recommendation B: Standards and Expectations

We recommend that schools, colleges, and universities adopt more rigorous and measurable standards, and higher expectations, for academic performance and student conduct, and that four-year colleges and universities raise their requirements for admission. This will help students do their best educationally with challenging materials in an environment that supports learning and authentic accomplishment.

Implementing Recommendations

1. Grades should be indicators of academic achievement so they can be relied on as evidence of a student's readiness for further study.

2. Four-year colleges and universities should raise their admissions requirements and advise all potential applicants of the standards for admission in terms of specific courses required, performance in these areas, and levels of achievement on standardized achievement tests in each of the five Basics and, where applicable, foreign languages.

3. Standardized tests of achievement (not to be confused with aptitude tests) should be administered at major transition points from one level of schooling to another and particularly from high school to college or work. The purposes of these tests would be to: (a) certify the student's credentials; (b) identify the need for remedial intervention; and (c) identify the opportunity for advanced or accelerated work. The tests should be administered as part of a nationwide (but not federal) system of state and local standardized tests. This system should include other diagnostic procedures that assist teachers and students to evaluate student progress.

4. Textbooks and other tools of learning and teaching should be upgraded and updated to assure more rigorous content. We call upon university scientists, scholars, and members of professional societies, in collaboration with master teachers, to help in this task, as they did in the post-Sputnik era. They should assist willing publishers in developing products or publish their own alternatives where there are persistent inadequacies.

5. In considering textbooks for adoption, states and school districts should: (a) evaluate texts and other materials on their ability to present rigorous and challenging material clearly; and (b) require publishers to furnish evaluation data on the material's effectiveness.

6. Because no textbook in any subject can be geared to the needs of all students, funds

should be made available to support text development in "thin-market" areas, such as those for disadvantaged students, the learning disabled, and the gifted and talented.

7. To assure quality, all publishers should furnish evidence of the quality and appropriateness of textbooks, based on results from field trials and credible evaluations. In view of the enormous numbers and varieties of texts available, more widespread consumer-information services for purchasers are badly needed.

8. New instructional materials should reflect the most current applications of technology in appropriate curriculum areas, the best scholarship in each discipline, and research in learning and teaching.

Recommendation C: Time

We recommend that significantly more time be devoted to learning the New Basics. This will require more effective use of the existing school day, a longer school day, or a lengthened school year.

Implementing Recommendations

1. Students in high schools should be assigned far more homework than is now the case.

2. Instruction in effective study and work skills, which are essential if school and independent time is to be used efficiently, should be introduced in the early grades and continued throughout the student's schooling.

3. School districts and state legislatures should stongly consider seven-hour school days as well as a 200- to 220-day year.

4. The time available for learning should be expanded through better classroom management and organization of the school day. If necessary, additional time should be found to meet the special needs of slow learners, the gifted, and others who need more instructional diversity than can be accommodated during a conventional school day or school year.

5. The burden on teachers of maintaining discipline should be reduced through the development of firm and fair codes of student conduct that are enforced consistently, and by considering alternative classrooms, programs, and schools to meet the needs of continually disruptive students.

6. Attendance policies with clear incentives and sanctions should be used to reduce the amount of time lost through student absenteeism and tardiness.

7. Adminstrative burdens on the teacher and related intrusions into the school day should be reduced to add time for teaching and learning.

8. Placement and grouping of students, as well as promotion and graduation policies, should be guided by the academic progress of students and their instructional needs, rather than by rigid adherence to age.

Recommendation D: Teaching

This recommendation consists of seven parts. Each is intended to improve the preparation of teachers or to make teaching a more rewarding and respected profession. Each of the seven stands on its own and should not be considered solely as an implementing recommendation.

Implementing Recommendations

1. Persons preparing to teach should be required to meet high educational standards, to demonstrate an aptitude for teaching, and to demonstrate competence in an academic discipline. Colleges and universities offering teacher-preparation programs should be judged by how well their graduates meet these criteria.

2. Salaries for the teaching profession should be increased and should be professionally competitive, market-sensitive, and performance-based. Salary, promotion, tenure, and retention decisions should be tied to an effective evaluation system that includes peer review so that superior teachers can be rewarded, average ones encouraged, and poors ones either improved or terminated.

3. School boards should adopt an 11-month contract for teachers. This would ensure time for curriculum and professional development, programs for students with special needs, and a more adequate level of teacher compensation.

4. School boards, administrators, and teachers should cooperate to develop career ladders for teachers that distinguish among the beginning instructor, the experienced teacher, and the master teacher.

5. Substantial nonschool personnel resources should be employed to help solve the immediate problem of the shortage of mathematics and science teachers. Qualified individuals including recent graduates with mathematics and science degrees, graduate students, and industrial and retired scientists could, with appropriate preparation, immediately begin teaching in these fields. A number of our leading science centers have the capacity to begin educating and retraining teachers immediately. Other areas of critical teacher need, such as English, must also be addressed.

6. Incentives, such as grants and loans, should be made available to attract outstanding students to the teaching profession, particularly in those areas of critical shortage.

7. Master teachers should be involved in designing teacher-preparation programs and in supervising teachers during their probationary years.

Recommendation E: Leadership and Fiscal Support

We recommend that citizens across the nation hold educators and elected officials responsible for providing the leadership necessary to achieve these reforms, and that citizens provide the fiscal support and stability required to bring about the reforms we propose.

Implementing Recommendations

1. Principals and superintendents must play a crucial leadership role in developing school and community support for the reforms we propose, and school boards must provide them with the professional development and other support required to carry out their leadership role effectively. The Commission stresses the distinction between leadership skills involving persuasion, setting goals and developing community consensus behind them, and managerial and supervisory skills. Although the latter are necessary, we believe that school boards must consciously develop leadership skills at the school and district levels if the reforms we propose are to be achieved.

2. State and local officials, including school-board members, governors, and legislators, have *the primary responsibility* for financing and governing the schools, and should incorporate the reforms we propose in their educational policies and fiscal planning.

3. The federal government, in cooperation with states and localities, should help meet the needs of key groups of students such as the gifted and talented, the socio-economically disadvantaged, minority and language-minority students, and the handicapped. In combination, these groups include both national resources and the nation's youth who are most at risk.

4. In addition, we believe the federal government's role includes several functions of national consequence that states and localitites alone are unlikely to be able to meet: protecting constitutional and civil rights for students and school personnel; collecting data, statistics, and information about education generally; supporting curriculum improvement and research on teaching, learning, and the management of schools; supporting teacher training in areas of critical shortage or key national needs; and providing student financial assistance and research and graduate training. We believe the assistance of the federal government should be provided with a minimum of administrative burden and intrusiveness.

5. The federal government has *the*

primary responsibility to identify the national interest in education. It should also help fund and support efforts to protect and promote that interest. It must provide the national leadership to ensure that the nation's public and private resources are marshaled to address the issues discussed in this report.

6. This Commission calls upon educators, parents, and public officials at all levels to assist in bringing about the educational reform proposed in this report. We also call upon citizens to provide the financial support necessary to accomplish these purposes. Excellence cost. But in the long run mediocrity costs far more.

America Can Do it

Despite the obstacles and difficulties that inhibit the pursuit of superior educational attainment, we are confident, with history as our guide, that we can meet our goal. The American educational system has responded to previous challenges with remarkable success. In the 19th century our land-grant colleges and universities provided the research and training that developed our nation's natural resources and the rich agricultural bounty of the American farm. From the late 1800's through the mid-20th century, American schools provided the educated workforce needed to seal the success of the Industrial Revolution and to provide the margin of victory in two world wars. In the early part of this century and continuing to this very day, our schools have absorbed vast waves of immigrants and educated them and their children to productive citizenship. Similarly, the nation's black colleges have provided opportunity and undergraduate education to the vast majority of college-educated black Americans.

More recently, our institutions of higher education have provided the scientists and skilled technicians who helped us transcend the boundaries of our planet. In the last 30 years, the schools have been a major vehicle for expanded social opportunity and now graduate 75 percent of our young people from high school. Indeed, the proportion of Americans of college age enrolled in higher education is nearly twice that of Japan and far exceeds other nations such as France, West Germany, and the Soviet Union. Moreover, when international comparisons were last made a decade ago, the top 9 percent of American students compared favorably in achievement with their peers in other countries.

In addition, many large urban areas in recent years report that average student achievement in elementary schools is improving. More and more schools are also offering advanced-placement programs and programs for gifted and talented students, and more and more students are enrolling in them.

We are the inheritors of a past that gives us every reason to believe that we will succeed.

A Word to Parents and Students

The task of assuring the success of our recommendations does not fall to the schools and colleges alone. Obviously, faculty members and administrators, along with policymakers and the mass media, will play a crucial role in the reform of the educational system. But even more important is the role of parents and students, and to them we speak directly.

To Parents

You know that you cannot confidently launch your children into today's world unless they are of strong character and well-educated in the use of language, science, and mathematics. They must possess a deep respect for intelligence, achievement, and learning, and the skills needed to use them; for setting goals; and for disciplined work. That respect must be accompanied by an intolerance for the shoddy and second-rate masquerading as "good enough."

You have the right to demand for your children the best our schools and colleges can provide. Your vigilance and your refusal to be satisfied with less than the best are the imperative first step. But your right to a proper education for your children carries a double responsibility. As surely as you are your child's first and most influential teacher, your child's ideas about education and its significance begin with you. You must be a *living* example of what you expect your children to honor and to emulate. Moreover, you bear a responsibility to participate actively in your child's education. You should encourage more diligent study and discourage satisfaction with mediocrity and the attitude that says "let it slide"; monitor your child's study; encourage good study habits; encourage your child to take more demanding rather than less demanding courses; nurture your child's curiosity, creativity, and confidence; and be an active participant in the work of the schools. Above all, exhibit a commitment to continued learning in your own life. Finally, help your children understand that excellence in education cannot be achieved without intellectual and moral integrity coupled with hard work and commitment. Children will look to their parents and teachers as models of such virtues.

To Students

You forfeit your chance for life at its fullest when you withhold your best effort in learning. When you give only the minimum to learning, you receive only the minimum in return. Even with your parents' best example and your teachers' best efforts, in the end it is *your* work that determines how much and how well you learn. When you work to your full capacity, you can hope to attain the knowledge and skills that will enable you to create your future and control your destiny. If you do not, you will have your future thrust upon you by others. Take hold of your life, apply your gifts and talents, work with dedication and self-discipline. Have high expectations for yourself and convert every challenge into an opportunity.

A Final Word

This is not the first or only commission on education, and some of our findings are surely not new, but old business that now at last must be done. For no one can doubt that the United States is under challenge from many quarters.

Children born today can expect to graduate from high school in the year 2000. We dedicate our report not only to these children, but also to those now in school and others to come. We firmly believe that a movement of America's schools in the direction called for by our recommendations will prepare these children for far more effective lives in a far stronger America.

Our final word, perhaps better characterized as a plea, is that all segments of our population give attention to the implementation of our recommendations. Our present plight did not appear overnight, and the responsibility for our current situation is widespread. Reform of our educational system will take time and unwavering commitment. It will require equally widespread, energetic, and dedicated action. For example, we call upon the National Academy of Sciences, National Academy of Engineering, Institute of Medicine, Science Service, National Science Foundation, Social Science Research Council, America Council of Learned Societies, National Endowment for the Humanities, National Endowment for the Arts, and other scholarly, scientific, and learned societies for their help in this effort. Help should come from students themselves; from parents, teachers, and school boards; from colleges and universities, from local, state and federal officials; from teachers' and administrators' organizations; from industrial and labor councils; and from other groups with interest in and responsibility for educational reform.

It is their America, and the America of all of us, that is at risk; it is to each of us that this imperative is addressed. It is by our willingness to take up the challenge, and our resolve to see it through, that America's place in the world will be either secured or forfeited. Americans have succeeded before and so we shall again.

Graph I
Receipts—By Sources Available for Use for Current Expenditures 1982-83

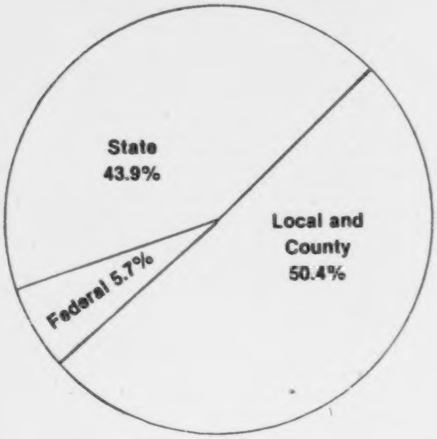

TABLE 1a
RECEIPTS—BY SOURCES AVAILABLE FOR USE FOR CURRENT EXPENDITURES—1982-83

Sources	Amount	Percent
Local and County[1]	$900,916,722	50.4%
State[2]	783,121,394	43.9%
Federal[3]	101,497,483	5.7%
Total	$1,785,535,599	100.0%

Formula:

Part A.
1. Local and County from Part B-1, plus result from Part C.
2. State from Part B-2.
3. Federal from Part B-3.

Part B. Incidental and Teachers Fund
1. Local, Part II, 5199 plus 5299 in columns one and two minus 5123 and 5180 in one and two; minus 6510, 6520, 6530, 6541, 6542, 6551, 6552, and 6590 on Part III C, column 1; minus 5150 on Part II, column 1; minus 5170 on Part II, columns one and two.
2. State, Part II, 5399, columns one and two minus 5371 on column one.
3. Federal, Part II, 5499, columns one and two minus 5436 in column one; minus 1.2 percent of 5411, 5423, 5429, 5431 5432, 5433, 5434, 5435, and 5440 in columns one and two.

Part C. A portion of Building Fund that is current (III C, column four, 6510 plus 6520, plus 6530 plus 6541 plus 6542 plus 6551 plus 6552 plus 6590 plus 6220).

Less Part II, column four, 5610 plus 5690, 5499, 5399. If negative, erase number and go to Part A. If positive, subtract this value from Part III, column four, 5111 plus 5112 plus 5113 plus 5114 plus 5140 plus 5190 plus 5221 plus 5231. If result negative, erase number and go to Part A. If positive, save number and add to Part A.

District data available in Table 4, Part IV.

1978 – 79	526,839,692	430,421,669	46,095,538	50,322,491	0
1979 – 80	593,578,545	482,580,418	53,244,692	56,314,835	$1,438,600
1980 – 81	683,617,059	550,889,554	65,241,138	65,403,593	2,082,774
1981 – 82	707,611,141	564,197,662	71,024,374	69,777,049	2,612,056
1982 – 83	697,600,408	558,551,154	69,531,417	66,747,185	2,770,652

*The minimum guarantee portion of the Foundation Formula was prorated at 154,955 percent in 1975 – 76 and 174,762 in 1976 – 77. The 75th General Assembly changed the Foundation Formula so that minimum guarantee was apportioned with an adjustment factor of .057867 for 1982 – 83.

Table 9b
Payment Record 1982-83

Year	Fair Share*	Proposition C**
1982-83	$18,572,152	$78,627,059

*Fair Share Fund is 4¢ tax on cigarettes.
**School District Trust Fund is 1¢ Sales Tax – Note that ½ of this money is to offset lowered current tax revenue and is not "new" revenue.

TABLE 10
EXPENDITURE FACTORS

Year	Eligible Pupils*	Current Expenditure	SEF
1976 – 77	885,175.66	$1,112,595,510	$1,256.92
1977 – 78	860,963.38	1,204,766,453	1,399.32
1978 – 79	835,479.05	1,304,129,483	1,560.94

* Resident I data indicate attendance in home districts.
Resident I plus Resident II data equal state total ADA.

+ Resident II data indicate attendance outside home district.

‡ Kindergarten pupil attendance—two sessions equal one day attendance.

TABLE 37
SUMMARY OF COURSES OFFERED IN SUBJECT MATTER FIELDS

Number of Course Titles: There is a listing of course titles for each major area published each year (see Table 36). This number is the aggregate of that listing by area.

Duplicated Count of Students: If a student is enrolled in more than one course in a major area, the student will be counted for each course.

Percent of 9-12 Students Enrolled: This is the ratio of students enrolled in the major areas divided by fall state enrollment for 9-12 grades. The comparison of years shows activities of areas.

Year	# of Course Titles	Duplicated Count of Students	% of 9-12 Fall Enrolled
Agriculture			
82-83	28	22,074	8.6
81-82	29	23,496	8.8
80-81	29	23,061	8.3
79-80	29	24,916	8.5
78-79	25	25,350	8.3
77-78	24	26,026	8.2
76-77	24	26,363	8.3
75-76	25	26,059	8.2

Not Elsewhere Classified	11,435	11,973	12,849	49,923	70,464	82,521
Totals	84,421	87,218	80,792	177,789	180,242	179,951

b. Manpower Training Section
(Comprehensive Employment and Training Act)
(Oct. 1—Sept. 30)

Year	Number of School Districts Offering	Number of Teachers	Enrollments
1977-78	39	225	5,622
1978-79	54	312	7,794
1979-80	60	348	8,700
1980-81	57	324	8,088
1981-82	55	314	7,850
1982-83	55	305	7,603

c. Adult Basic Education

Year	Schools Conducting Classes	Number Teachers Certified	Number Students Enrolled
1977-78	54	744	23,319
1978-79	52	776	26,762
1979-80	50	989	33,292
1980-81	49	1,030	34,965
1981-82	47	749	30,947
1982-83	48	716	28,534

d. Veterans Education

Year	Number of Approved Schools	Number of Approved Business Establishment	Number in Training
1977-78	404	1,413	22,493
1978-79	402	1,226	17,240
1979-80	369	1,064	14,134
1980-81	359	1,026	13,391
1981-82	356	607	11,206
1982-83	363	437	9,460

e. High School Equivalence

Year	Total Applications	Number of Certificates Issued	Percent Failing to Meet State Standards
1977-78	14,010	6,914	35%
1978-79	14,182	8,718	39%
1979-80	15,684	8,982	43%
1980-81	18,251	11,190	39%
1981-82	15,986	9,628	40%
1982-83	16,124	9,636	41%

f. Community Education Program

Statistical Items	1980-81	1981-82	1982-83
Districts			
Number of Schools with Community Education	137	104	111
Number of Schools having Written Resolution/Policy	65	64	61
Personnel			
Community Ed. Coordinators/Directors	143	131	158
Community Education Support Personnel	153	198	254
Community Education Instructors	3,720	3,979	4,143
Individuals in Programs	231,812	239,004	249,778

B. PROGRAMS DATA

a. Special Ecuation Programs

1982-83

Category	Total Number of Children (Duplicated Count)	Total Number of Teachers	Approved Reimbursement
Aides	...	2,000.50	$4,001,000
Homebound/Contractual	2,514	...	482,125
Orthopedic	775	83.50	856,961
Deaf And Hard of Hearing	734	95.25	977,556
Blind and Partially Seeing	195	22.50	230,919
Mentally Retarded	17,478	1,408.00	10,837,408
Speech	45,371	899.75	9,234,164
Learning Disabilities	35,420	2,268.25	23,279,099
Behavior Disorders	6,746	632.00	6,486,230
Remedial Reading*	N/A	(1,339.25)	(8,019,429)
Professional Personnel	...	845.25	3,381,000
Severely Handicapped	722	86.25	885,184
Early Childhood	1,167	74.75	767,165
Totals	111,122	8,416.00	$61,418,811

*Effective FY 1982, Remedial Reading no longer administered by Special Education Section and not in totals.
NOTE: Approved amount was reduced by 5.11% during 1982-83 school year. The above data does not reflect the reduction of funding.

b. State Schools for Severely Handicapped—Statistical Summary

Attendance Schools	Aggregate Days Membership	Days in Session	A.D.M.	Total Days Attendance	A.D.M.	No. Pupils Transported
52	421,131	174	2,420	372,912.5	2,143	5,579

During fiscal year 1983, 79 workshops paid 4,631 handicapped workers total wages of $5,257,047.90 averaging $.84 per hour. State aid paid to those workshops totaled $5,597,638.

C. MISSOURI SCHOOL TRUST FUNDS

Section 162.790 (5) RSMo., authorizes the State Board of Education to accept grants, gifts, donations, or bequests for the use of the Missouri Schools for the Blind, for the Deaf, and for the Handicapped Children to deposit same in the Schools' Trust Fund in the State Treasury, or to invest such funds in stocks, bonds, deeds of trust, or any other investment securities in the amounts and in the proportions that the State Board of Education prudently selects.

The act further provides that "moneys in the School for the Blind Trust Fund or in the School for the Deaf Trust Fund or the School for the Handicapped Children Trust Fund shall not be appropriated for the support of the schools in lieu of general state revenues but shall be appropriated only for the purpose of carrying out the object for which the grant, gift, donation, devise or bequest was made," as recommended by the State Board of Education.

a. SCHOOL FOR THE DEAF TRUST FUND
BALANCE SHEET
June 30, 1983

Assets

Cash in bank – Boatmen's National Bank of St. Louis		$ 1,596.62
Cash in Bank – State Treasury		670.31
Investments:		
Sears Roebuck Acceptance Corp. Variable Interest Note	$8,000.00	
Government Bonds (M/V – $96,545.20)	94,798.98	
Total Investments		102,798.98
Furniture, Fixtures and Equipment		19,548.42
Total Assets		$124,614.33

Fund Balance

Fund Balance	$124,614.33
Total Fund Balance	$124,614.33

b. MISSOURI SCHOOL FOR THE DEAF TRUST FUND
ANALYSIS OF CHANGES IN FUND BALANCE
July 1, 1982—June 30, 1983

Balance, July 1, 1982		$111,634.89
Add:		
Interest Received	$14,047.00	14,047.00
Less:		
Loss on Sale – Investments, Land & Building	$ 50.00	
Bank Fees	708.88	
Office Supplies	67.43	
Memorial Expense	241.25	1,067.56
Fund Balance, June 30, 1983		$124,614.33

c. HANDICAPPED CHILDREN TRUST FUND
BALANCE SHEET
June 30, 1983

Assets

Cash in bank – Boatmen's National Bank of St. Louis		$ 1,134.20
Cash in bank – State Treasury		105.76
Investments:		
Sears Roebuck Acceptance Corp. Variable Interest Note	$ 9,000.00	
Government Bonds (M/V – $39,756.15)	69,898.70	
Total Investments		78,898.70
Total Assets		$80,138.66

Fund Balance

Restricted Fund Balance*	$24,065.85
Unrestricted Fund Balance	56,072.81
Total Fund Balance	$80,138.66

*Restricted as follows: $3,790.05 – Maple Valley State School, gift of Gladstone Fraternal Order of Police. $20,275.80 – B. W. Sheperd State School, gifts from Adele S. Holt Estate ($6,082.74), James Lynn Estate ($2,635.84), and Peppin Estate ($11,557.21).

d. HANDICAPPED CHILDREN TRUST FUND
ANALYSIS OF CHANGES IN FUND BALANCE
July 1, 1982—June 30, 1983

Balance, July, 1982		$49,918.73
Add:		
Interest Received	$7,197.00	
Cash Gifts — Estates	25,028.31	32,225.31
Less:		
Loss on Sale — Invest,ment	12.50	
Bank Fees	$ 282.45	
Equipment Purchase*	1,710.43	2,005.38
Fund Balance, June 30, 1983		$80,138.66

*Equipment purchased for Mapaville State Schools from funds restricted for that purpose.

e. SCHOOL FOR THE BLIND TRUST FUND
BALANCE SHEET
June 30, 1983

Assets		
Cash in bank — Boatmen's National Bank of St. Louis		$9,935.69
Cash in bank — State Treasury		13,395.20
Investments:		
Variable Interest Notes	$194,000.00	
Government Bonds (M/V — $1,215,678.25)	1,172,247.88	
Corporate Bonds (M/V — $517,368.84)	624,968.75	
Common Stocks (M/V — $1,238,018.25)	726,182.85	
Total Investments		2,717,399.48
Furniture and Fixtures		112,804.52
Land and Building — Recorded at cost		586,737.98
Total Assets		$3,440,272.87
Fund Balance		
Restricted Fund Balance*		$ 20,000.00
Unrestricted Fund Balance		3,420,272.87
Total Fund Balance		$3,440,272.87

*Restricted as follows: To assist graduates in starting life on self-supporting basis. Gift from Eula E. Reynard Estate.

f. SCHOOL FOR THE BLIND TRUST FUND
ANALYSIS OF CHANGES IN FUND BALANCE
July 1, 1982—June 30, 1983

Balance, July 1, 1982		$3,102,688.02
Add:		
Cash Dividends	$ 51,415.11	
Interest Received	215,420.49	
Cash Gifts—Estates	75,706.63	
Stock Gifts—Estates	45,654.41	
Gain on Sale—Investments, Land & Building	3,430.82	388,627.46
Less:		
Loss on Sale - Investments, Land & Building	$ 125.00	
Bank Fees	10,034.45	
Office Supplies	299.60	
Repair & Maintenance	2,457.00	
Therapeutic Expense	29,711.60	
Instructional Expense	8,410.46	
Filing Fees	4.50	51,042.61
Fund Balance, June 30, 1983		$3,440,272.87

TABLE 41
VOCATIONAL REHABILITATION

A. Summary Data for Year Ending September 30, 1983

Persons Served and Rehabilitated		Average Cost	
Per Case Served	Per Case Rehabilitated	Served	Rehabilitated
35,943	5,184	$704.70	$4,885.97

B. Services and Cost to the 5,184 Clients Rehabilitated

Services	Number of Clients with Cost	Total Cost *
All Services*	4,865	$9,341,779

*The costs represent only amounts spent for services purchased by the agency. Some services have been obtained free of charge or may have been paid for, wholly or in part, by other organizations, interested individuals, or by the client himself. Excludes cost of administration, counseling, guidance and placement.

C. Jobs After Rehabilitation

Professional, Technical & Managerial Occupations	665
Clerical and Sales Occupations	738
Service Occupations	1,277
Farming, Fishery, Forestry, & Related Occupations	154
Industrial Occupations	1,403
Work in Sheltered Workshops	463
Homemakers (own home) and Other Unpaid Family Workers (own family)	484
Total	5,184

D. Earnings At Referral and At Closure for 5,184 Rehabilitants

Weekly Earnings at Referral	Number of Rehabilitants	Weekly Earnings at Closure	Number Rehabilitants
None	4,418	None	515
$01-19	39	$01-19	477
$20-39	82	$20-39	356
$40-59	83	$40-59	228
$60-79	88	$60-79	295
$80-99	62	$80-99	195
$100 +	412	$100 +	3,118
Average weekly earnings at referral	$16	Increase in average weekly earnings	$105*
Average weekly earnings at closure	$121		

*With an increase in average weekly earnings of $105 for the 5,184 rehabilitants, the total annual increase in earnings would amount to $28,304,640.

E. Disability Determinations Section processed 76,143 cases during fiscal year 1983.

TABLE 42
TESTING AND ASSESSMENT
PROGRAM DATA

A. Summary of 1982-83 BEST Test

BEST	Percent Passing Test
Reading	95.8
Math	78.3
Govt./Econ.	84.5
All Three Subtests	72.6

Passing Criteria: At least 1 of 3 items correct on each of the 13 objectives and at least 75 percent of the subtest items correct.
Testing Dates: March 1-15, 1983
Total number of eighth graders taking all three Subtests—58,872
Total number of eighth grade students—63,274

B. BEST Reading/Language Arts Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least:		
	1 of 3	2 of 3 (Mastery)	3 of 3
1. Identification and interpretation of medical terms	99.9	99.2	89.0
2. Identification and interpretation of labels and symbols	99.9	99.6	97.5
3. Interpretation of labels in selection for specific purpose	99.6	97.2	82.3
4. Proper response to commonly used signs	99.9	99.6	96.0
5. Use reference materials and sources to obtain information	99.6	97.9	86.5
6. Recognize main ideas	99.4	95.3	69.7
7. Note purpose of writer	99.6	96.5	79.5
8. Recognize a correctly completed form	99.8	98.8	75.3
9. Interpret business correspondence and contracts	99.8	97.9	85.7
10. Identify information in various sections of a newspaper	99.7	98.0	89.3
11. Interpretation of common documents (menu, ballot)	99.5	96.2	78.0
12. Follow written directions	99.6	98.5	93.4
13. Interpretation of graphic information	99.1	95.6	79.6
Number of students tested:		58,515	
Number of students passing this subtest:		56,053	(95.8%)

Locally Administered Objectives	Percent Passing	
14. Speak effectively in business and social situations	93.4	
15. Write sentences using acceptable grammar, punctuation, and spelling	89.2	
16. Use reference materials and sources	92.6	
17. Recognize main idea and details of an oral presentation	91.8	
18. Complete a business form correctly	92.7	
19. Communicate by reading orally	94.4	
20. Locate parts of a newspaper	92.6	
21. Follow oral and written directions	93.5	
Number of students passing	47,283	(80.3%)

C. BEST Mathemathics Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least: 1 of 3	2 of 3 (Mastery)	3 of 3
1. Addition and subtraction of whole numbers	99.8	99.0	91.9
2. Multiplication and division of whole numbers	99.3	97.0	86.5
3. Addition and subtraction of fractions	99.7	98.8	89.6
4. Multiplication and division of fractions	98.8	92.8	72.5
5. Business and consumer transactions	93.9	75.9	38.9
6. Measurement of length, area, and volume	93.3	77.8	52.8
7. Measurement of time and temperature	98.9	90.4	58.0
8. Interpret charts, graphs, tables, maps, scale drawings	98.8	96.2	86.7
9. Ratio and proportion	98.0	98.5	77.7
10. Interpret probability and statistical statements	98.7	93.6	67.4
11. Determine averages	95.9	85.5	69.5
12. Identify horizontal, vertical, parallel, intersecting lines	97.8	90.7	70.1
13. Identify simple plane and solid geometric figures	98.4	89.8	63.2
Number of students tested:		58,489	
Number of students passing this subtest		45,792	(78.3%)

Locally Administered Objectives	Percent Passing	
14. Measure length, volume, weight, time and temperature	91.6	
15. Estimate results and answers to computational problems	91.7	
Number of students passing	52,168	(88.6%)

D. BEST Government/Economics Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least: 1 of 3	2 of 3 (Mastery)	3 of 3
1. Understand terms such as "democracy"	99.5	97.7	86.5
2. Understand process of making, enforcing, interpreting laws	97.3	85.4	47.5
3. Understand rights guaranteed to a citizen	99.1	95.3	75.3
4. Recognize limits on individual rights and freedoms	99.1	93.9	69.3
5. Understand basic responsibilities of citizenship	99.4	97.9	89.8
6. Understand roles of government officials	97.2	83.6	53.5
7. Understand factors related to production of goods and services	99.0	95.2	78.6
8. Understand and apply information about how private business functions	98.7	94.3	79.8
9. Understand how government functions in U.S. economy	98.2	90.6	57.6
10. Predict how change in economy will result in other changes	97.6	92.0	73.5
11. Make rational personal economic decisions	98.2	92.2	65.6
12. Recognize the rights and responsibilities of consumers	98.6	95.1	82.8
13. Understand use and handling of money and investments	98.3	91.3	67.3
Number of students tested:		58,421	
Number of students passing this subtest		49,393	(84.5%)

11. Use context to determine the meaning of a word with multiple meanings	38	63	64	77
12. Recognize the main idea of a passage when stated explicitly	58	72	83	77
13. Answer questions about specific details	42	59	83	71
14. Identify the sequence of events in a passage	62	77	84	78
15. Read and follow directions	40	59	64	76
Domain – Interpretive and Critical Comprehension				
16. Recognize the main idea (inferred)	10	48	40	28
17. Identify implied cause and effect relationships	13	25	75	57
18. Predict what will happen later	25	66	57	48
19. Draw conclusions	33	76	51	66
20. Identify irrelevant material	34	77	74	43
21. Interpret emotional reactions of characters	45	81	78	59
22. Interpret figurative language (in context)	43	72	68	61
23. Distinguish fact from opinion	30	58	57	47
24. Distinguish the fanciful from the real	44	80	66	62
Domain – Study Skills				
25. Describe the function of a book index, table of contents, and appendix	11	25	60	56
26. Locate words in a dictionary	23	47	37	47
27. Locate information in an encyclopedia	8	26	71	32
28. Find information using the library catalogue card	14	55	63	28
29. Read maps	19	53	62	42
30. Read a summary chart (timeline)	23	47	52	57

Average number of objectives mastered = 10.2
Average percent of objectives mastered = 34
Average percent of correct response = 61
Number of students tested = 14,987
Mean raw score = 55.19
Standard Deviation = 16.96
*Mastery = 3 of 3 items correct for an objective

Mathematics

Object Statement	% Mastered	% of Correct Responses for each item		
Domain – Numeration				
1. Determine place value of numerals through hundred thousands	52	76	62	81
2. Read numerals through one million	55	77	72	83
3. Read numerals through millions, using expanded notation	52	68	80	70
4. Round numbers to the nearest ten, hundred, thousand, ten thousand	19	42	64	66
Domain – Addition and Subtraction				
5. Add two 2-digit through 4-digit numbers, regrouping	66	85	76	85
6. Perform column addition of three 2-digit numbers, regrouping	66	81	79	80
7. Subtract 2-digit through 4-digit numbers, regrouping	34	66	46	57
8. Solve one-step word problems of addition or subtraction, no regrouping	61	84	84	70
9. Express the value of a group of coins less than $1	75	89	87	83
Domain – Multiplication and Division				
10. Multiply 1-or 2-digit numbers by 1-digit numbers through the table of 9's, no regrouping	45	57	59	56
11. Multiply 2-digit numbers by 1-digit numbers, regrouping	24	50	52	37
12. Multipiy 3-digit numbers by 1-digit numbers, regrouping	17	36	48	41
13. Multiply 2-digit numbers by 2-digit numbers regrouping	4	21	23	17
14. Divide 1-or 2-digit numbers by 1-digit numbers, no regrouping or remainder	38	55	66	60
15. Divide 2-digit numbers by 1-digit numbers, regrouping and/or remainder	13	37	45	37
16. Solve one-step word problems of multiplication or division, no regrouping	28	55	42	62
17. Determine the average of a set of numbers, no remainder	2	11	10	19
Domain – Fractions				
18. Identify fractional parts of a region	37	52	63	56
19. Identify a fractional part of a set	14	24	51	53
20. Identify fractions in simplest form	25	63	46	60
21. Identify equivalent fractions	2	22	33	10
22. Add and subtract fractions with like denominators	4	16	30	30
23. Solve decimal problems with money, addition and subtraction regrouping	18	54	56	34
Domain – Geometry				
24. Distinguish among lines, line segments, rays and angles	13	46	38	52
25. Identify simple plane geometric figures	77	81	85	86
26. Find the area of simple plane geometric figures by counting squares	13	68	20	72
27. Find the perimeter of simple polygons, given dimensions of all sides	57	66	75	76
Domain – Graphs				
28. Identify points on a grid, given the coordinates	8	26	22	35
29. Interpret graphs	40	82	51	69
Domain – Time Telling				
30. Tell time by minute intervals	38	59	61	60

Average number of objectives mastered = 10.0
Average percent of objectives mastered = 33
Average percent of correct responses = 55
Number of students tested = 14,937
Mean raw score = 49.72
Standard Deviation = 15.18
*Mastery = 3 of 3 items correct for an objective

J. Statewide Results of 1983 Criterion- and Norm-Referenced Sixth Grade Test

Part I: Criterion-referenced section

Reading

Objective: (Learner will...)	% Mastered	% of Correct Responses for each item		
1. Understand medical terms and instructions	55	55	46	64
2. Understand caution labels on bottles, etc.	81	94	82	67
3. Select use of items based on consumer terms	84	86	91	76
4. Respond properly to road signs	82	64	87	94
5. Follow simple directions	87	89	86	87
6. Understand common information signs	63	88	65	37
7. Use building floor plan and schedule	70	86	80	43
8. Recall facts from handbook on safety	58	57	73	45
9. Know how to use a street guide and its map	54	39	70	52
10. Be able to fill in blanks on a form	62	74	62	49
11. Select use of product based on ingredients	76	87	87	53
12. Know how to use telephone directory	83	87	89	74
13. Know how to use a building directory	84	93	70	90
14. Identify items from a business statement	65	79	65	52
15. Know how to use an entertainment guide	73	92	41	86

Part II: Norm-referenced section

The norm-referenced section of the test was normed against a national sample by Science Research Associates, Inc. (SRA), using SRA Achievement Series Scores Reading Form ES Green. The average score for the 17,281 Missouri students taking this test in 1983 was at the 58 percentile, compared to the national norm of 50 percent.

Mathematics

Objective: (Learner will...)	% Mastered	% of Correct Responses for each item		
1. Know how to make change	76	73	78	78
2. Find total income from avg. weekly income	91	90	91	92
3. Calculate wages from hourly rate and hours	68	83	59	62
4. Determine and compare unit costs	44	44	47	40
5. Find take home pay from salary and deduction	70	68	70	71
6. Figure daily amounts from weekly budget	26	24	32	23
7. Find multiples of itemized weekly expenses	75	74	78	72
8. Compute a sales slip, including tax	50	49	51	50
9. Estimate weekly savings to buy an item	57	52	57	61
10. Calculate weekly wages from piecework rate	60	58	58	64
11. Compute monthly rate to repay a debt for a year	49	48	53	47
12. Compute total and average scores in sports	53	57	53	50
13. Find total materials cost from unit costs	47	42	44	56
14. Determine recipe amounts from different size groups	53	63	35	60
15. Calculate distance from time and rate	77	76	77	77

The norm-referenced section of the test was normed against a national sample by Science Research Associates, Inc. (SRA), using SRA Achievement Series Scores Math Form ES Green. The average score for the 17,258 Missouri students taking this test in 1983 was at the 63 percentile, compared to the national norm of 50 percent.
